

Information Architecture

The structural blueprint — page templates, depth hierarchy, URL conventions, content relationships, validation rules.

01 · IA PRINCIPLES

Seven rules that govern every page on the site.

01 Company-first, product-second	02 Capability-led grouping	03 Problems before products	04 Single hub, many spokes
Every primary node speaks for LTS the partner before any individual product.	Products are organised by what they do for the buyer — not by what they are called.	Pages route: I have a problem → which capability solves it → which products support it → visit product site.	Parent site routes traffic TO 4 external product sub-sites → never duplicates them.
05 Max 8 primary nav items	06 Two conversion destinations	07 About / Insights / Industries are first-class	
Old IA had 20+ flat links; new IA holds at 8.	Every page funnels to /contact/book-* OR an external product sub-site.	Hidden in the old IA, promoted to primary nodes.	

02 · TOP-LEVEL TAXONOMY

8 primary nodes — each answers a specific buyer question.

URL	CATEGORY	BUYER QUESTION
/	Home	Who is LTS and what do they actually do?
/about	About	Can I trust these people?
/lean-transformation	Lean Transformation	Do they understand Lean or just sell software?
/products	Product Ecosystem	How do all the products fit together?
/industries	Industries	Have they done this in my sector?
/services	Services	What do they actually do for me?
/insights	Insights	Do they have real expertise to share?
/contact	Contact	How do I start a conversation?

03 · CONTENT DEPTH

Maximum 3 clicks from Home. Four levels — never deeper.

L0	Home 1 page	/
L1	Primary nav node 7 pages	/about /products /services ...
L2	Section hub or category ~50 pages	/products/performance /about/leadership /insights/blog
L3	Detail page ~40 pages	/products/lean-assessment /services/training/film-green-belt

04 · PAGE TEMPLATES

Every one of the ~100 pages uses one of these 8 templates.

T1 Marketing Hub Multi-section storytelling page USED ON /, /about, /lean-transformation, /products, /industries, /services, /insights	T2 Topic Detail Single-topic deep dive USED ON All /products(/product), /industries(/sector), /services(/ler)/deliverable	T3 Theme Page Sub-category hub USED ON /products/performance /shopfloor /quality /strategy	T4 Methodology Page Framework deep-dive USED ON /lean-transformation/methodology/spqdm pqvc hoshin-kanri vsm-poe dmaic
T5 Service Tier Hub Tier overview + deliverables USED ON /services/consulting /implementation /training /custom-software	T6 Article Long-form editorial USED ON /insights/blog(slug), /insights/case-studies(slug)	T7 Index / Listing Filterable list USED ON /insights/blog /case-studies, /whitepapers, /webinars, /videos, /templates, /categories*	T8 Booking Form Conversion-optimised form USED ON /contact, /book-consultation, /book-discovery-call, /book-industry-discovery, /book-maturity-assessment

05 · URL STRUCTURE RULES

Six rules. Apply to every URL.

DO → Lowercase, hyphenated, no trailing slash DONT → No CamelCase, no underscores, no .html	/lean-transformation ✓ /Lean_Transformation/ ✗
DO → Noun-led, verb-free DONT → No /get-trained, /book-now	/services/training ✓ /services/get-trained ✗
DO → Stable once published — change via 301s DONT → Don't rename URLs after launch	Once /products/q-point exists, it never moves
DO → Hierarchy mirrors visual nav DONT → No /paged123, no slug salad	/products/performance/date-paint reads aloud
DO → External products use their own domain DONT → Don't proxy via /products/itany/	cmsssoftwre.leantransitionsolutions.com 📄
DO → Booking sub-routes capture intent in URL DONT → Don't dump everything into /contact	/contact/book-maturity-assessment routes to a different consultant

06 · CROSS-REFERENCE MATRIX

Bidirectional links that connect sections — the IA's ligaments.

FROM	TO	WHY
/products/(theme)	/lean-transformation/methodology	These products implement these frameworks
/lean-transformation/methodology/(framework)	/services/training/(belt)	We teach these frameworks too
/industries/(sector)	/insights/case-studies (filtered)	Read how we did it in your sector
/insights/case-studies/(slug)	Products mentioned	Here are the products from this case
/insights/blog/(slug)	/about/leadership/(author)	About the author
/services/training/(belt)	/about/certifications	Why our certification is accredited
/products/where-to-start	/products/(theme)	Problem-picker output
Any page	/contact/book-(intent)	Persistent orange CTA

07 · VALIDATION CHECKLIST

Gate before any new page ships.

☒ Does it answer a buyer question that no existing page answers?
☒ Does it live under one of the 8 primary nav nodes?
☒ Is it ≤ 3 clicks from /?
☒ Does it use one of the 8 templates?
☒ Does it cross-link to at least one other section?
☒ Does it route to a primary CTA?
☒ Does its URL follow the naming convention?
